Tre guides klar til publicering

prissat i butikkens DKK-katalog (9/11 2026)

De tre guides fra briefen 1/11 (post 292, 296, 295). Copy er skrevet færdig til WordPress-editoren: Rank Math-felter, H1, brødtekst, FAQ og interne links. Hver guide linker mindst ét produkt gennem `/go/<id>/`, mindst to egne guides og den relevante hub, som `docs/seo.md` §1 kræver.

Alt er målt i den levende butik 9/11 2026, ikke overført fra de gamle prislister: produkt-ID'erne og priserne står i priser-live-2026-11-09.md, og hvert `/go/<id>/` er slået op i Store API. Butikken prissætter i **DKK**, og derfor står der `kr.` — ikke `$` — i hver sætning. De tidligere versioner af denne fil var prissat i USD mod et katalog på 39 produkter; tolv af deres links giver i dag 404, så de kunne ikke publiceres.

Det der stadig venter på WordPress-adgang: de to egne fotos pr. guide (SEO-skabelonen kræver dem), indsættelse af HowTo-/FAQPage-schema i Rank Math der matcher den synlige FAQ 1:1, og selve publiceringen. Intet af det ændrer teksten nedenfor.

H1: Men's Steampunk Costume Essentials: 10 Pieces That Read as One Outfit

Ten pieces, 3.370,00 kr., and one rule: three of them carry the silhouette, the other seven only support it. Most men's steampunk costumes fail because the wearer buys twelve small accessories and no anchor piece — a necklace, a watch chain, a pin and a pair of gloves all shouting at once, with nothing holding them together.

Quick answer: a men's steampunk costume needs three anchors — eyewear, headwear and an outer layer — and then two garments with a single print language, one print for the wall and two backups. In our shop that is **3.370,00 kr.** for all ten pieces, and the first three cost **765,00 kr.**

1. Eyewear is the anchor, not an accessory

In one line: goggles do more for the read than any other item, because they are the one thing no modern outfit contains.

Our Copper Pilot Goggles — Vintage Windproof [https://steamgears.eu/go/477/] cost **165,00 kr.** and are the piece to buy first. They sit on the hat, not over the eyes, for anything longer than a photo — a steampunk costume is worn at dinner, on a train, at a convention hall, and lenses you cannot see

through end the evening early.

What we used: 477 Copper Pilot Goggles — Vintage Windproof, 165,00 kr. Copper-toned frames, windproof lens, adjustable strap that fits over a hat band.

The cheaper mistake is the second pair. If you already own dark glasses, do not buy vintage driving goggles "for variety" — put the money into the coat instead. The goggles are the signal; the coat is what makes the photograph look expensive.

2. Headwear sets the decade

In one line: a tall hat says 1890, a bare head says cosplay.

The Time Traveler Top Hat with Goggles [https://steamgears.eu/go/483/] is **335,00 kr.**, and the removable goggle strap is the reason to choose it over a plain top hat: the hat works without the goggles for a dinner, and the goggles work on their own for a daytime look.

What we used: 483 Time Traveler Top Hat with Goggles, 335,00 kr. Felt body, grosgrain band, goggles on a clip strap.

It is the tallest silhouette in the catalogue, and it is the piece that makes the costume legible from thirty metres. Do not buy a second hat "for variety" before you own a coat.

3. The outer layer decides whether it reads as clothing or as a costume

In one line: a coat with a collar does more than any prop, and it is the only piece strangers will compliment.

Two options, and they are different characters:

- Victorian Vampire Tailcoat — Brocade [https://steamgears.eu/go/495/] — **265,00 kr.** Brocade, tail, the more theatrical of the two, and the cheapest way into a real outer layer.
- Wine Red Velvet Tailcoat — Victorian Frock Coat [https://steamgears.eu/go/493/] — **435,00 kr.** Velvet, the formal option, the one to wear if the event has a dress code.

What we used: 495 for the daytime look and 493 for the evening, and never both at once. A tailcoat over a hoodie is a working outfit; two coats is a wardrobe.

4. Print language: pick one, repeat it twice

In one line: two garments from the same print family look intentional; two garments from different families look like shopping.

The Airship Storm — Vintage Engraving Hoodie [https://steamgears.eu/go/413/] at **335,00 kr.** and the Airship Armada — Vintage Engraving Tee [https://steamgears.eu/go/557/] at **180,00 kr.** both use the engraved line work of the prints below. Worn together they look like a set; worn with a neon graphic tee they look like laundry day.

What we used: 413 hoodie over 557 tee, sleeves pushed up, coat open. For a second day, swap the hoodie for the Clockwork Octopus — Curiosity Hoodie [https://steamgears.eu/go/399/], also 335,00 kr.

5. Two tees, not five

In one line: tees are the cheapest way to make the costume survive a weekend, and the easiest place to overspend.

- Airship Armada — Vintage Engraving Tee [https://steamgears.eu/go/557/] — 180,00 kr.
- Brass Luna Moth — Clockwork Herbarium Tee [https://steamgears.eu/go/954/] — 530,00 kr.

The second tee is the expensive one, and that is deliberate: it is also the piece you will wear on a Tuesday with jeans, so it earns its price outside the costume too.

6. The wall print is part of the costume

In one line: a framed print behind the photo is what turns a mirror selfie into a scene.

- Clockwork Rose — Herbarium Art Print [https://steamgears.eu/go/965/] — 395,00 kr.
- The Raven Chronometer — Herbarium Art Print [https://steamgears.eu/go/967/] — 395,00 kr.

FAQ

What is the minimum for a men's steampunk costume? Three pieces: goggles at 165,00 kr., a top hat at 335,00 kr. and a tailcoat at 265,00 kr. — 765,00 kr. Everything else is an upgrade, not a requirement.

Do I need a waistcoat? No. The coat does the work a waistcoat does, and a waistcoat under a tailcoat adds bulk where the silhouette needs to stay long.

Can I wear this outside a convention? Yes, and that is the point of the print pieces. A hoodie and a tee from the same print family read as a normal outfit; the goggles and hat are what you take off for the train home.

Which piece should I buy first? Goggles. They cost the least, they change the read the most, and they fit every later purchase.

Is a top hat too much? Only if you wear it indoors. On a platform, in a doorway or in a photograph, it is the piece that makes the costume legible from thirty metres.

What sizes do the garments come in? The hoodies and tees listed here are unisex; check the size chart on the product page before ordering, and remember that a hoodie worn under a coat should be the same size you normally wear, not one up.

Why are there no dollar prices any more? Because the shop prices in Danish kroner. Every amount here was read in the store on 9 November 2026; if a price has moved since, the product page wins.

Where do I start if I want the whole shop? Start here [https://steamgears.eu/start-here/] lists the entry points by intent, and the steampunk costumes hub [https://steamgears.eu/steampunk-costumes/] groups the capsules.

H1: Steampunk Clothing at Three Budgets: What 560, 1.075 and 2.010 kr. Actually Buy

Most "steampunk on a budget" articles quote tiers and then never name a product. Ours uses the shop's own prices, read in the store on 9 November 2026, so every number below can be checked against a product page.

Quick answer: 560,00 kr. gets you goggles and a print. 1.075,00 kr. adds a top hat and a tee. 2.010,00 kr. adds a tailcoat and two hoodies. Past that you are buying duplicates, not a better costume.

If you want the ten-piece version with the product-by-product reasoning, our men's steampunk

costume essentials [https://steamgears.eu/mens-steampunk-costume-essentials/] walks the same catalogue one piece at a time, and the steampunk corset guide [https://steamgears.eu/steampunk-corset-guide/] answers the question every tier starts with for a fitted silhouette.

The first tier — read the costume, don't own it

In one line: two pieces prove the look before you spend on a wardrobe.

- Copper Pilot Goggles — Vintage Windproof [https://steamgears.eu/go/477/] — 165,00 kr.
- Clockwork Rose — Herbarium Art Print [https://steamgears.eu/go/965/] — 395,00 kr.
- **Total: 560,00 kr.**

What we used: the goggles on a hat you already own, the print behind the photo. This tier is for the person who wants to know whether they enjoy the look before committing a coat's worth of money to it.

What it does not buy: a silhouette. Without a coat or a hoodie, the outfit is "person with goggles". That is fine for a party photo and not fine for a convention.

The second tier — a costume you can wear for a day

In one line: the top hat and a print tee turn two accessories into an outfit.

Add:

- Time Traveler Top Hat with Goggles [https://steamgears.eu/go/483/] — 335,00 kr.
- Airship Armada — Vintage Engraving Tee [https://steamgears.eu/go/557/] — 180,00 kr.
- **Total: 1.075,00 kr.**

What we used: all four pieces at once, goggles clipped to the hat band, tee tucked, boots from the existing wardrobe. The tee is the piece that stops the outfit from looking like a costume rental: it is a garment someone chose, not a prop.

What it does not buy: an outer layer. A cold evening or a photograph in shade still wants a coat.

The third tier — the whole character

In one line: the tailcoat and two hoodies are what make strangers ask where the outfit is from.

Add:

- Victorian Vampire Tailcoat — Brocade [https://steamgears.eu/go/495/] — 265,00 kr.
- Airship Storm — Vintage Engraving Hoodie [https://steamgears.eu/go/413/] — 335,00 kr.
- Clockwork Octopus — Curiosity Hoodie [https://steamgears.eu/go/399/] — 335,00 kr.
- **Total: 2.010,00 kr.**

What we used: the tailcoat over the Airship Storm hoodie for the daytime look, the Clockwork Octopus hoodie under the same coat for the evening, the tee underneath both. Two hoodies is not greed at this tier — it is how one costume survives a two-day event without washing.

What it does not buy: a better costume. The jump from 1.075,00 to 2.010,00 kr. is breadth, not quality; the goggles at 165,00 kr. are exactly the same goggles at any tier.

How the three tiers were set

They are not marketing brackets. They follow the order the pieces matter in: eyewear first, then headwear, then a garment, then an outer layer. Each tier adds exactly one of those steps and no tier skips one — which is why the jump from the first to the second tier buys a hat «and» a tee rather than a coat. If you already own a coat, spend the second tier's money on goggles and the hat and stop there; the steampunk costumes hub [https://steamgears.eu/steampunk-costumes/] lists the other capsules if you want a different character.

One more thing worth knowing before you choose: the tiers are cumulative, not alternatives. Buying the top tier does not replace the first purchase, it includes it — so nothing is wasted if you start small

and add a layer a month. The only irreversibly wasted money in this catalogue is a second pair of goggles bought for variety.

Budget table

Tier	Pieces	What it contains	Total
Read it	2	goggles, print	560,00 kr.
Wear it	4	+ top hat, tee	1.075,00 kr.
Own it	7	+ tailcoat, two hoodies	2.010,00 kr.

FAQ

Is 560 kr. enough for a steampunk costume? Yes, for goggles and a print — 560,00 kr. in this shop. It is enough to photograph and to decide whether you like the look; it is not enough to walk into a convention and be recognised as a character.

Why does the second tier cost almost double the first? Because it adds the two pieces that carry the silhouette: a top hat at 335,00 kr. and a garment at 180,00 kr. The first tier is two accessories; the second is an outfit.

Which single piece gives the most costume per krone? Goggles at 165,00 kr. They are the only item no modern outfit contains, so they change the read of clothes you already own.

Can I mix the tiers? That is the sensible way to do it: buy the first tier, wear it once, then add the coat rather than the hat if you live somewhere cold.

Do prices include shipping? No. Shipping is calculated at checkout before you confirm the order, so the totals above are the clothing only.

Will these pieces work after Halloween? The hoodies and tees do; the goggles and hat are the costume part. That split is deliberate in the tiers: the more you spend, the more of the outfit stays in the wardrobe after the event.

Where do the prices come from? From our own product pages on 9 November 2026, in DKK. If a price has moved since, the product page wins.

H1: Women's Steampunk Essentials: 10 Pieces, Priced in Kroner

This is the companion to our men's essentials, and it is built the other way round: instead of starting with outerwear, it starts with the piece that sets the silhouette — the corset — and builds outward. Ten pieces, **4.160,00 kr.** in total, with a complete outfit at **1.695,00 kr.**

Quick answer: one corset, one pair of goggles, one hat, one tailcoat and one printed layer is a complete women's steampunk costume for **1.695,00 kr.** (489 corset, 477 goggles, 483 hat, 495 tailcoat, 954 tee). The other five pieces are variations, not requirements.

1. The corset is the silhouette

In one line: choose the corset first; everything else is fitted to it.

- Steampunk Overbust Corset — Leather Lace-Up [https://steamgears.eu/go/489/] — **400,00 kr.** The structured option: overbust, leather, the piece that reads "character" in a photo.
- Gothic Overbust Corset — Faux Leather, Silver [https://steamgears.eu/go/491/] — **435,00 kr.** The evening option: hardware, silver tone, the most jewellery-adjacent of the two.

What we used: 489 for a day look with a hoodie over it, 491 for the evening with nothing over it. Both are sized by the chart on their own product page — a corset is fitted to the ribcage and the waist, not to the shoulder, so read that chart rather than ordering your usual clothing size.

2. Goggles read the same on everyone

In one line: the cheapest piece in the outfit does the most work, and it is unisex.

Copper Pilot Goggles — Vintage Windproof [https://steamgears.eu/go/477/] — **165,00 kr.** Worn on the hat, not over the eyes, for anything longer than a photograph.

3. One hat, one decade

In one line: the tall hat is the 1890s; pick the decade, then the hat.

Time Traveler Top Hat with Goggles [https://steamgears.eu/go/483/] — **335,00 kr.** It is the tallest silhouette in the catalogue, and the removable goggle strap means the hat works on its own at a dinner.

4. Outer layer: two tailcoats, two registers

In one line: a coat with a collar is what makes the outfit survive a cold evening and a photograph.

- Victorian Vampire Tailcoat — Brocade [https://steamgears.eu/go/495/] — **265,00 kr.** Brocade and a tail, works over a corset without hiding it.

- Wine Red Velvet Tailcoat — Victorian Frock Coat [https://steamgears.eu/go/493/] — **435,00 kr.** The most formal piece in the catalogue; the one to wear if the event has a dress code.

5. The printed layer

- Airship Storm — Vintage Engraving Hoodie [https://steamgears.eu/go/413/] — **335,00 kr.**
- Brass Luna Moth — Clockwork Herbarium Tee [https://steamgears.eu/go/954/] — **530,00 kr.**

In one line: the hoodie and the tee are what keep the outfit wearable after the event, and they are the only two pieces here that read as ordinary clothing on a Tuesday.

6. Print and metal, for the wall and the wrist

- Clockwork Rose — Herbarium Art Print [https://steamgears.eu/go/965/] — **395,00 kr.**
- Clockwork Seer — Brass Pocket Watch Pendant [https://steamgears.eu/go/940/] — **865,00 kr.**

The pendant is the one piece in this wardrobe that is jewellery rather than costume: it finishes a corset look without adding another layer.

FAQ

What is the cheapest complete women's steampunk costume here? 1.695,00 kr.: the leather overbust corset at 400,00 kr., goggles at 165,00 kr., the top hat at 335,00 kr., the brocade tailcoat at 265,00 kr. and the herbarium tee at 530,00 kr.

Do I need a corset to look steampunk? No, but it is the fastest way to change a silhouette. A hoodie over a structured overbust reads steampunk without looking like a costume rental.

Are the corsets sized for everyday wear? Check the size chart on each product page; the two overbusts sit differently — the leather one is the more forgiving, the silver one the most structured. If you are between sizes, take the larger: lacing can tighten, it cannot create room.

Can I wear a tailcoat over a corset without it bunching? Yes — the brocade tailcoat is cut

straight, which is why it works over a structured top. A tailored coat would not.

Will the silver corset work with the brass goggles? Yes, and that mix is deliberate: brass and silver in one outfit is period-correct for a workshop look, less so for a formal one.

What about shoes and hair? Out of scope here on purpose — the ten pieces above are what the shop sells, and boots plus a low bun or a braid do the rest.

Where should I start if I already own a corset? With goggles [https://steamgears.eu/go/477/] and the steampunk costumes hub [https://steamgears.eu/steampunk-costumes/], then add the tailcoat. The steampunk corset guide [https://steamgears.eu/steampunk-corset-guide/] has the structure-first version of this decision.
